牦牛绒 是取自高原牦牛（主要分布于青藏高原及周边地区）绒毛层的一种天然动物纤维。与普通羊毛相比，牦牛绒纤维更细、更柔软，且具有优异的保暖性和透气性，被誉为“雪山软黄金”。

特性：

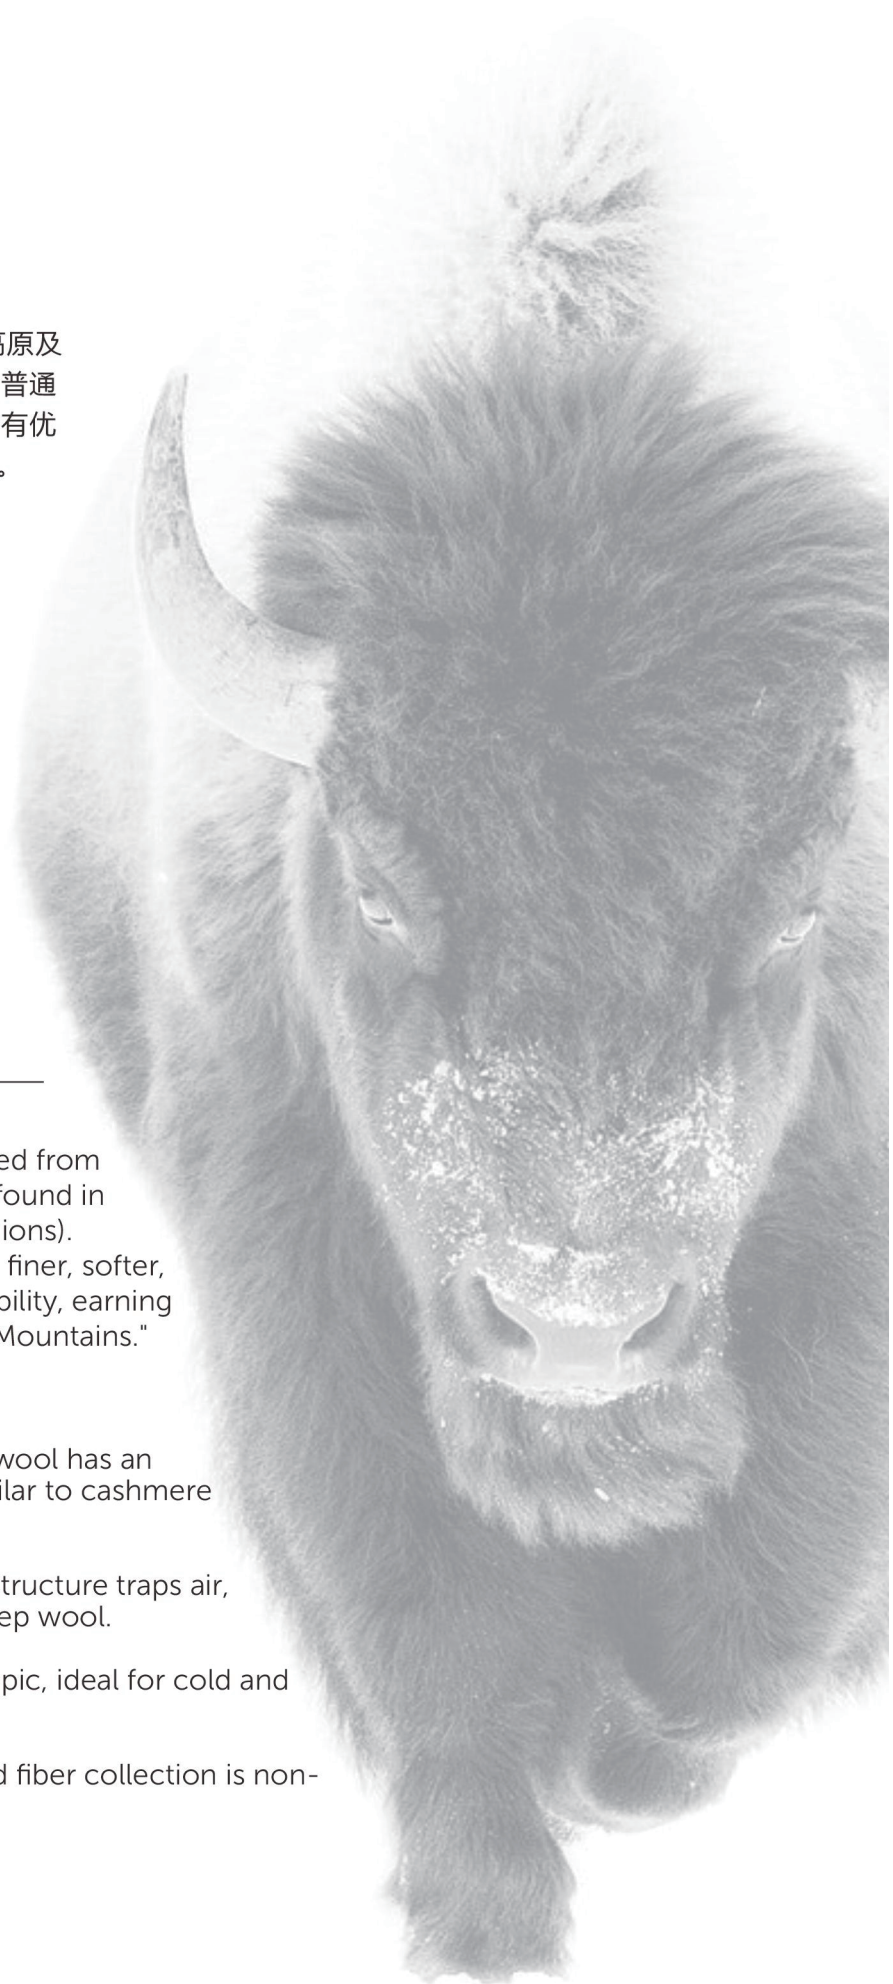

1. 细度与柔软度：优质牦牛绒平均细度为15-20微米，接近山羊绒 (Cashmere)，触感细腻。
2. 保暖性：纤维中空结构锁住空气，隔热性能优于普通羊毛。
3. 吸湿排汗：天然吸湿性强，适合高寒潮湿环境。
4. 生态友好：牦牛为自然放牧，绒毛采集不伤害动物，可持续性高。

Yak wool is a natural animal fiber obtained from the downy undercoat of yaks (primarily found in the Tibetan Plateau and surrounding regions). Compared to ordinary wool, yak wool is finer, softer, and offers superior warmth and breathability, earning it the nickname "Soft Gold of the Snow Mountains."

Key Features:

1. Fineness & Softness: High-quality yak wool has an average diameter of 15-20 microns, similar to cashmere goat fiber, with a smooth texture.
2. Thermal Insulation: The hollow fiber structure traps air, providing better heat retention than sheep wool.
3. Moisture-Wicking: Naturally hygroscopic, ideal for cold and humid climates.
4. Eco-Friendly: Yaks are free-range, and fiber collection is non-invasive, ensuring sustainability.
